WOODRUFF HEALTH EDUCATORS ACADEMY PRESENTS

WHEA FELLOWSHIP IN
EDUCATIONAL SCHOLARSHIP

A longitudinal certificate program for all health professions educators consisting of a workshop series focused on developing educational research skills coupled with a mentored scholarly project to be conducted in the participants' authentic education settings.

LEARNING OBJECTIVES

After completing this WHEA fellowship, participants will be able to:

- Use strong research skills to develop and implement a scholarly project in their educational area of interest,
- Analyze outcomes of educational activities and submit them to local, regional, and/or national meetings for presentation and/or publication,
- Position themselves to become education leaders and experts in their areas of interest,
- Interact across schools and sites to serve as the foundation for continued development of interprofessional educational expertise in the health sciences at Emory.

WHO SHOULD APPLY

Educators from any of the Emory health sciences schools, centers, programs, or practice sites who are dedicated to and passionate about educating students, trainees, faculty, or others, and who would like to enhance their education scholarship skills. At least two years of educational experience preferred; support of administrative unit required.
