Emory Winship Cancer Institute Overview

As Georgia’s first and only National Cancer Institute Designated Cancer Center, Emory University’s Winship Cancer Institute serves as the coordinating center for a vast array of resources in medical, surgical, radiation oncology, diagnostic imaging, and the subspecialties of cancer care throughout Emory University.

Emory Winship is part of Emory’s Woodruff Health Sciences Center, Emory Healthcare and Emory University. Researchers and clinical members of the cancer center are faculty at Emory or at partner institutions such as Georgia Institute of Technology. Faculty members collaborate with national and state agencies, including the U.S. Centers for Disease Control and Prevention and the American Cancer Society. Emory Winship also is enhanced by its close relationship with Emory’s own School of Medicine, Rollins School of Public Health, and the Nell Hodgson Woodruff School of Nursing, all with strong cancer related programs.

In addition, Emory Winship is a partner in the Georgia Cancer Coalition, an innovative public/private initiative that brings together Georgia’s leading hospitals and universities, biotech firms, civic groups, and non-profit and government agencies to help treat, prevent and save lives from cancer. Winship’s partnership with the Georgia Cancer Coalition helps to extend the benefits of NCI Cancer Center Designation through initiatives such as the Georgia Center for Oncology Research and Education (Georgia CORE), which works to expand availability of clinical cancer research throughout Georgia by fostering collaboratives with community practices.

The Emory Winship Cancer Institute is committed to community events and professional education. Its largest community event, the annual Celebration of Living, brings together hundreds of cancer patients and survivors for a day of educational seminars and the special camaraderie that those whose lives are touched by cancer can share.

Recently, Emory was recognized as one of the top 50 cancer centers in the United States by *U.S. News and World Report* and received the Blue Cross Blue Shield Designation for Treatment of Rare and Complex Cancers.
