A Message from the Executive Vice President

Transforming Health and Healing is both the vision and the promise of the Woodruff Health Sciences Center. It means pioneering discoveries that advance our understanding of disease prevention and treatment, preparing the next generation of health professionals to save and improve lives in communities worldwide, and continuously improving the quality of care for our patients. Some of the recent accomplishments made possible by our collaborators, trustees, donors, and friends include the following:

- Emory School of Medicine opened a new, state-of-the-art education building that enabled inauguration of a completely revamped medical curriculum.
- We recently expanded our work in clinical trials to increase access to new treatments. These efforts received a major boost from a $31 million NIH grant to help us create a clinical research partnership with Morehouse School of Medicine, Georgia Tech, and Children’s Healthcare of Atlanta. In cancer, we worked with community partners to implement the first state-wide clinical trial for patients with breast cancer. Meanwhile, early-stage clinical trials of an AIDS vaccine developed at Yerkes National Primate Research Center and the Emory Vaccine Center are under way.
- In its first year of existence, Emory’s Global Health Institute helped fund eight projects in low-resource countries, ranging from a drug discovery program in South Africa to a diabetes intervention in India.
- The Center for Health Discovery and Well-Being, part of the Emory/Georgia Tech Predictive Health Institute, opened at our midtown campus to provide participants personalized health programs designed to address individual health risks.
- Nell Hodgson Woodruff School of Nursing was one of 15 nursing schools in the nation tapped by the Robert Wood Johnson Foundation to develop quality and safety education curricula as part of a new model for nursing education.
- With a recent $50 million investment from its family namesake, Rollins School of Public Health will break ground this spring on a complex that will double its current space and accelerate teaching and research in global and predictive health, infectious disease, nutrition, cancer, and diabetes.

A glimpse at these milestones and others throughout this book will show how we are bringing to reality our vision to transform health and healing.

Fred Sanfilippo, MD, PhD
Executive Vice President for Health Affairs
CEO, Woodruff Health Sciences Center
Chairman, Emory Healthcare

On the cover: Rhazes (c. 850–c. 932), Persia’s first physician, wrote a learned synthesis of medical thought. He is featured on one of 33 panels of a mosaic on the history of medical science from 10,000 BCE to the present. The three-story mosaic is located in the Woodruff Health Sciences Center Administration Building.
The Robert W. Woodruff Health Sciences Center (WHSC) encompasses components of Emory University responsible for education of health professionals, research affecting health and illness, patient care, and policies for prevention and treatment of disease. The WHSC’s namesake, the legendary leader of The Coca-Cola Company, was a man whose vision and generosity left a lasting imprint on Emory and on Atlanta.

In addition to the WHSC components listed in the following pages, Emory University includes Emory College, Oxford College, a graduate school of arts and sciences, and professional schools of business, law, and theology. The student body, including the WHSC, totals 12,570. Faculty total 3,077 and employees, 22,404 (including faculty). At $5.6 billion (as of fiscal year 2007), Emory’s endowment ranks 17th among universities in the United States.

Many of the WHSC facilities are located on or near Emory’s main campus, 631 acres along the Clifton Corridor, 15 minutes from downtown Atlanta. Emory’s Briarcliff Campus, 1 mile west of the main campus, is the site of EMTech, a business incubator developed with Georgia Tech. Emory’s Clairmont campus, 1 mile east of the main campus, is the site of residential facilities for patients’ families.

Faculty and staff perform the WHSC’s core missions—teaching, research, and patient care—at various hospitals owned by or affiliated with Emory and at a number of Emory Healthcare sites and affiliates throughout the city and state. Physicians in Emory Healthcare and affiliate hospitals are responsible for 4.4 million patient visits a year.

Comprehensive Figures
The Woodruff Health Sciences Center’s annual budget is $2.2 billion, and its patient care component, Emory Healthcare, provided $53.6 million in charity care in fiscal year 2007. Research funding for 2006–2007 was $358.7 million. Faculty: 2,334, plus 1,556 adjunct or volunteer faculty and collaborative scientists. Students and medical residents in training: 4,351, including 434 students in the Graduate Division of Biological and Biomedical Sciences and 533 postdoctoral fellows. Employees: 14,544, including Emory Healthcare. Total employees, including faculty: 16,878. A partnership with Hospital Corporation of America and a joint venture with Emory-Adventist Hospital bring the WHSC’s total hospital beds to 1,708, total annual hospital admissions to 56,503 and total outpatient visits to 2.4 million.

Woodruff Health Sciences Center Components
The Woodruff Health Sciences Center includes Emory University School of Medicine, Nell Hodgson Woodruff School of Nursing, Rollins School of Public Health, Yerkes National Primate Research Center, and Emory Healthcare, the WHSC’s system of clinical operations.

Emory University School of Medicine (founded 1854)
*Thomas J. Lawley, MD, Dean*
Emory University School of Medicine is ranked among the nation’s finest institutions for education, biomedical research, and patient care. The school had 43 applications in 2007 for each of its first-year positions, and its students perform extremely well compared with their peers at other schools. In 2007, for example, the pass rate for first-time takers of part 1 of the National Board Exam was 99%. On graduation, almost half of the school’s students pursue residencies in primary care.

Student totals for the entering class of 2011 increased by 15% to 133. This increase was made possible by the opening of a new medical school building in 2007, which enabled implementation of a completely revised medical curriculum. The school has a total of 480 medical students and trains more than 1,100 residents and fellows in 80 accredited programs. The school has 66 MD/PhD students in one of the 40 Medical Scientist Training Programs sponsored by the NIH and 454 postdoctoral fellows. Some of these MD/PhD students are in a joint program with Georgia Institute of Technology, with which the medical school shares a biomedical engineering department ranked second in the country in 2007 by *U.S. News & World Report*. The medical school has 14 MD/MPH and two MD/MBA students. More than 240 medical school faculty also train predoctoral bioscience researchers in one or more of the eight programs of the university’s Graduate Division of Biological and Biomedical Sciences.

Faculty in five health professions programs train 420 students. These include a physician assistant program ranked third in the nation by *U.S. News & World Report* and a physical therapy doctoral program ranked eighth.

The medical school’s faculty received $301.3 million in sponsored research in 2007, including $36.5 million received by medical faculty at Yerkes National Primate Research Center. Ranked 18th nationally in NIH dollars received, the school is one of the fastest-growing recipients of NIH awards in the country. The school has 2,053 full- and part-time faculty and 995 volunteer faculty.
Physician faculty in Emory’s own hospitals, affiliated teaching hospitals, and outpatient venues are responsible for more than 3.6 million patient visits annually.

The school has 13,287 alumni (5,221 medical school and 8,280 residency alumni), and one of every four physicians in Georgia was trained at Emory. In addition to the school's regular education programs, 7,113 physicians and other health care professionals came to Emory last year to participate in continuing medical education.

In addition to Georgia Tech and other research institutions throughout the state and nation, the school maintains strong ties with the U.S. Centers for Disease Control and Prevention and with Children’s Healthcare of Atlanta through a joint venture agreement.

Nell Hodgson Woodruff School of Nursing (1905)

Marla E. Salmon, ScD, RN, FAAN, Dean

The Nell Hodgson Woodruff School of Nursing produces nursing leaders who are transforming health care through science, education, practice, and policy worldwide. It has 207 baccalaureate, 194 master’s, and 12 doctoral students as well as six postdoctoral fellows. Students who complete their undergraduate degree go on to become national and international leaders in patient care, public health, government, and education. The school offers a dual-degree program with several colleges, providing undergraduates with a strong background in liberal arts and nursing. The school’s master’s program offers opportunities to specialize in advanced nursing practice in a number of clinical settings and roles. Graduates are qualified to seek certification as nurse practitioners, nurse midwives, and/or clinical nurse specialists. A dual-degree option is available with the Rollins School of Public Health, allowing students to graduate with master’s degrees in both nursing and public health. In this program, students can major in international nursing, a rare offering in the United States or around the world. The school’s PhD program is focused on generating new knowledge to improve health and health care quality, with emphasis on research on bio-behavioral determinants of health, improving global health, and enhancing health systems.

In 2007, the school received $3.3 million in research funding. Nationally, the school ranks in the top 10 among private schools in research funding from the NIH. It currently is ranked 26th overall by U.S. News & World Report, which also ranked the school’s nurse midwifery graduate program eighth in the nation. Major programs include the Center for Research on Symptoms, Symptom Interactions, and Health Outcomes; the Lillian Carter Center for International Nursing; and the Fuld Fellowship, which targets second-career students with a special interest in serving vulnerable populations. The nursing school has 65 faculty and is affiliated with more than 300 clinical sites and 25 sites for community service learning. Additional learning sites are available, including an alternative spring break in four countries and a multiuniversity, multidiscipline collaborative summer program with Georgia migrant farm workers. The school has approximately 10,000 graduates.

Rollins School of Public Health (1990)

James W. Curran, MD, MPH, Dean

The Rollins School of Public Health has 781 master’s degree students; 121 PhD students who choose from degree options in behavioral sciences and health education, biostatistics, epidemiology, environmental and occupational health, health policy and management, and global health; and 21 postdoctoral fellows. The school has approximately 4,500 alumni.

A leader in interdisciplinary studies, the school offers dual-degree programs with medicine, nursing, health professions, business, and law. Master’s degrees also are available with a concentration in clinical research. The Career MPH is a distance-learning program for mid-career professionals who wish to pursue a degree while employed.

In 2007, the school recorded $54.7 million in research funding. These funds support research efforts in cancer epidemiology, nutrition, environmental and occupational health, HIV/AIDS education and prevention, addictive behaviors, youth violence, antibiotic resistance, micronutrient malnutrition, diabetes and obesity, and health care costs and allocation of health resources.

Many of the 180 full-time faculty and more than 250 adjunct faculty in six academic departments are linked by appointments, shared programs, or research grants with the CDC, The Carter Center, the American Cancer Society, CARE, the Arthritis Foundation, the Task Force for Child Survival and Development, and state and local public health agencies. Through these partnerships and in its role as a center for international health research and training, the school helps make Atlanta the public health capital of the world. The school is ranked 7th among peer institutions by U.S. News & World Report.
Yerkes National Primate Research Center (1930)

Stuart M. Zola, PhD, Director

One of eight national primate research centers funded by the NIH, Yerkes National Primate Research Center is dedicated to advancing scientific understanding and to improving human health and well-being. Supported by $42.6 million in funding, Yerkes’ research program includes approximately 115 projects. Studies involve 3,400 nonhuman primates, which provide a critical link between research with small laboratory animals and the clinical trials performed in humans. Approximately 1,150 of the animals are at the main center on the Emory campus and another 2,250 are at a 117-acre satellite facility in Lawrenceville, Georgia. In addition, the center has some 7,000 rodents in its research vivariums.

In addition to 331 staff members, Yerkes is home to 32 faculty scientists, 113 affiliate and 41 collaborative faculty, and 74 research associates from Emory and other institutions. More than 150 graduate and undergraduate students participate in research and educational programs at Yerkes, including 52 postdoctoral fellows.

Yerkes is making landmark discoveries in microbiology and immunology, neuroscience, psychobiology, and sensory-motor systems. One of the center’s primary goals, working with the Emory Vaccine Center, is to develop an AIDS vaccine to combat the global epidemic now affecting more than 42 million people.

Other significant research programs are seeking ways to increase understanding of progressive illnesses such as Parkinson’s and Alzheimer’s, unlock the secrets of memory, treat drug addiction, determine behavioral effects of hormone replacement therapy, address vision disorders, advance knowledge about the evolutionary links between biology and behavior, and interpret brain activity through imaging. Yerkes is the only U.S. primate center to have on-site MRI, PET, and cyclotron facilities.

Collaboration is key to Yerkes research. At the Living Links Center, scientists collaborate to study the animal roots of human social behaviors, such as cooperation, affiliation, and reconciliation. Yerkes researchers who also are members of the Center for Behavioral Neuroscience (CBN) collaborate with scientists from the CBN’s consortium of eight Atlanta-based institutions in research and education.

Because of their similarity to humans in genetic makeup, behavior, and organ-system function, nonhuman primates provide irreplaceable opportunities to better understand, prevent, and treat human disease.

Emory Healthcare (1997)

Fred Sanfilippo, MD, PhD, Chairman
John T. Fox, President and CEO

Emory Healthcare, the largest, most comprehensive health care system in Georgia (see pages 8-9), includes Emory University Hospital, Emory Crawford Long Hospital, Emory University Hospital Northlake, Wesley Woods Center, The Emory Clinic, Emory-Children’s Center, the jointly owned Emory-Adventist Hospital, and EHCA, a limited liability company created in collaboration with Hospital Corporation of America. Emory Healthcare has $1.5 billion in net revenue and provides $53.6 million in charity care annually. It has 10,093 employees and 1,310 hospital beds (1,708 beds counting joint ventures).

A key business area of Emory Healthcare is Emory Specialty Associates, an outreach physician group practice organization that includes specialty divisions of primary care, cardiology, anesthesiology, pathology, and emergency medicine.

In conjunction with Air Methods Corporation, Emory provides medical oversight for four Emory Flight helicopters from centers in metro Atlanta, Griffin, Jefferson, and Cartersville that cover Georgia and surrounding states. The helicopters are on 24-hour standby to lift critically ill patients to the closest appropriate hospital.

Emory Healthcare Components

The Emory Clinic (1953)

Wright Caughman, MD, Director
Don Brunn, COO

The primary port of access to adult patient care in Emory Healthcare and the largest, most comprehensive group practice in Georgia, The Emory Clinic has more than 1,200 physicians, nurse clinicians, and physician assistants. Employees: 2,327. Patient visits in 2007: 1,904,326. Clinic facilities on Emory’s campus include its multispecialty headquarters; the 1525 Building, which houses primary care as well as programs in preventive medicine, wellness, and Executive Health; the Winship Cancer Institute; and ambulatory practices at Wesley Woods. Facilities at Emory Crawford Long Medical Office Tower include more than 12 specialty practices, with care provided by nearly 80 physicians. Emory Clinic physicians also practice in a number of comprehensive health care centers throughout metro Atlanta—at the Orthopaedics & Spine Center at Executive Park and primary care and heart center facilities at Decatur,
Emory Healthcare

- **Emory Hospitals and Long-term Care**
  1. Emory University Hospital
  2. Emory Crawford Long Hospital
  3. Wesley Woods Center (includes Wesley Woods Hospital for geriatric care and Budd Terrace Nursing Home)
  4. Emory University Hospital Northlake

- **Joint Venture Hospitals**
  5. Emory-Adventist Hospital
  6. Emory Eastside Medical Center (EHCA)
  7. Emory Johns Creek Hospital (EHCA)

- **Emory-Children’s Center**
  8. Pediatric Clinic

- **The Emory Clinic**
  Primary and multispecialty care centers
  9. The Emory Clinic (Buildings A&B, Winship Cancer Institute, and 1525 Building)
  10. Wesley Woods
  11. Emory Orthopaedics & Spine Center
  12. Emory Crawford Long Medical Office Tower
  13. Decatur (primary care)
  14. Perimeter (primary care)
  15. Smyrna (primary care)
  16. Flat Shoals Parkway (primary care)
  17. Sugarloaf (primary care)
  18. Dunwoody (primary care)
  19. Emory Eastside (heart and vascular)
  20. Emory Johns Creek (heart and vascular)
Dunwoody, Flat Shoals Parkway, Perimeter, Emory Eastside, Emory Johns Creek, Smyrna, and Sugarloaf.

**Emory-Children’s Center (1997)**  
*Barbara J. Stoll, MD, CEO*

The largest pediatric multispecialty group practice in Georgia, the Emory-Children’s Center (ECC) is a joint venture between Emory and Children’s Healthcare of Atlanta. It comprises 200 Emory physician faculty involved in pediatric clinical services, teaching, research, and child advocacy. In addition to Children’s Healthcare of Atlanta (at Egleston, Scottish Rite, and Hughes Spalding hospitals), ECC provides specialty pediatric care at Emory Crawford Long Hospital, Grady Hospital, and at pediatric clinics on Emory’s campus. Patient visits in 2007: 92,131 (outpatient) and 102,702 (inpatient). Staff employees: 117.

**Emory University Hospital (1905)**  
*Robert J. Bachman, COO*

A 579-bed adult, tertiary care facility, Emory University Hospital is staffed exclusively by 960 Emory University School of Medicine faculty. It includes a 20-bed psychiatric facility, 102 ICU beds, a 56-bed rehab center, and a nine-bed clinical research center supported by the NIH. Patients in 2007: 23,494 admissions and 81,919 outpatient visits. Employees: 3,568. The hospital is long known for cardiology, cardiac surgery, orthopaedics, oncology, and neurology/neurosurgery and is one of the region’s most comprehensive multiple organ and tissue transplant centers. It was named in eight of 17 specialties ranked by *U.S. News & World Report* in the 2007 publication of America’s Best Hospitals. For the 10th year in a row, members of the Atlanta community named Emory University Hospital as the Consumer’s Choice Award winner.

**Emory Crawford Long Hospital (1908)**  
*Dane C. Peterson, COO*

A 511-bed community-based, tertiary care center in midtown Atlanta, Emory Crawford Long is staffed by 892 Emory medical faculty and 545 community physicians. This hospital celebrates its 100th anniversary in 2008. Medical services include 56 intensive care beds, a level 3 neonatal intensive care unit, and four hyperbaric oxygen units. Patients in 2007: 22,775 admissions and 157,138 outpatient visits. Employees: 2,749. Emory Crawford Long Hospital’s case-mix index (a measure of the complexity of illnesses treated) is higher than that of most community hospitals. The hospital is well known for services in cardiology, cardiac surgery, gastroenterology, and emergency medicine. Women’s services include prenatal and postnatal education, bone density testing, mammography, and obstetrics, with a specialization in high-risk pregnancy.

**Wesley Woods Center (1954)**  
*Albert K. Blackwelder, COO*

This geriatric center includes Wesley Woods Hospital (1987), a 100-bed geriatric specialty facility. Founded by the United Methodist Church and Emory University, Wesley Woods Center serves more than 30,000 elderly and chronically ill patients each year. In addition to the hospital and a 25-bed inpatient hospice service, Wesley Woods has an outpatient primary care clinic, a 250-bed skilled nursing care facility (Budd Terrace), and a 201-unit residential retirement facility (Wesley Woods Towers), with one floor of 18 units dedicated to personal care. Patients in 2007: 2,375 admissions and 37,584 outpatient visits. Employees: 665 (Wesley Woods Center) and 271 (Wesley Woods Senior Living residential retirement facilities, for which Emory Healthcare has management responsibilities). Wesley Woods is well known for its inpatient, outpatient, and day hospitalization programs in depression, sleep disorders, rehabilitation, and Alzheimer’s, Parkinson’s, and Huntington’s disease.

**Emory University Hospital Northlake (2007)**  
*Robert J. Bachman, COO*

A newly acquired 120-bed facility, Emory University Hospital Northlake provides diagnostic and support services for inpatient care and includes space allowing for teaching and research within the clinical environment.

**Emory-Adventist Hospital (1974)**  
*Dennis Kiley, President*

As part of its commitment to community care, Emory jointly owns Emory-Adventist Hospital with Adventist Health System. Located in Smyrna in rapidly growing Cobb County, this hospital has 88 acute care beds and is staffed by more than 175 physicians, including those from The Emory Clinic, who provide both primary care and specialized services. Patients in 2007: 1,939 admissions and 56,003 outpatient visits. Employees: 450.

**EHCA, LLC (1999)**  
*Lawrence H. Kloess III, FACHE, Chairman of the Board*

EHCA, LLC, is a limited liability company overseen by a board jointly governed by Emory Healthcare and
Hospital Corporation of America (HCA). Through this and another parent company, EHCA Johns Creek Holdings, Emory is responsible for clinical performance improvement and quality assurance in two local hospitals. HCA manages day-to-day operations of these facilities. EHCA broadens the community’s access to care under the Emory umbrella to 1,708 patient beds.

**Emory Eastside Medical Center (1980)**
*Kim Ryan, CEO*
Located in the suburban Atlanta city of Snellville, Emory Eastside Hospital (parent company EHCA) is a 200-bed acute care hospital with 450 Emory and community physicians. The hospital has a 12-bed labor and delivery unit and an 18-bed neonatal intensive care unit and nursery. Services also include specialty care for heart and cancer in addition to other specialties. Patients in 2007: 3,104 admissions and 20,159 outpatient visits. Employees: 1,500.

**Emory Johns Creek Hospital (2007)**
*John D. Quinlivan, CEO*
Located in the north metro community of Johns Creek, Emory Johns Creek Hospital (parent company EHCA Johns Creek Holdings) is a 110-bed facility staffed by 400 physicians, the majority of whom are community physicians. Emory anesthesiologists, radiologists, pathologists, and hospitalists provide hospital-based care. Services include emergency care, digital imaging, a birth center with level 3 neonatal intensive care, a bariatric center, intensive care, advanced cardiac care, and women’s services. Patients in 2007 (Feb.-Dec.): 2,816 admissions and 8,084 outpatient visits. Employees: 500.

**Affiliates for Patient Care, Teaching, and Research**
Emory University School of Medicine faculty also provide care, much of it highly specialized, through long-standing affiliations with the following:
- Grady Memorial Hospital, 953 beds. Staffed primarily by Emory physicians and residents, in collaboration with Morehouse School of Medicine.
- Children’s Healthcare of Atlanta at Egleston, 235 beds (Emory campus) and Children’s Healthcare of Atlanta at Hughes Spalding, 24 beds (Grady campus). Both staffed primarily by Emory pediatricians, including specialists and subspecialists.
- Atlanta Veterans Affairs Medical Center, 173 hospital beds and 100 nursing home beds. Staffed primarily by Emory physicians.

**Woodruff Health Sciences Center**
**Impact on Georgia**
As a dynamic destination for education, a robust research institution, and the largest, most comprehensive health care provider in the state, the Woodruff Health Sciences Center (WHSC) impacts Georgia in a variety of ways.
- It helps make Emory University the largest employer in DeKalb County and the largest private employer in the 20-county metro Atlanta area.
- With $2.2 billion in operating expenses, the WHSC’s annual economic impact on metro Atlanta is estimated at $4.8 billion.
- Two major new buildings opened in 2007, including a 162,000-square-foot medical school building and a 110-bed joint-venture hospital off campus (Emory Johns Creek Hospital). Emory also acquired a 120-bed hospital, christened Emory University Hospital Northlake, also off campus. Construction planned for the coming decade calls for new research buildings, a new public health building, a Yerkes Field Station facility, and new clinic and hospital space, including expansion of facilities on Emory’s campus in midtown Atlanta.
- Emory is a member of the Georgia Research Alliance (GRA), a partnership of business, research universities, and state government that fosters economic development in the state. Through the GRA, the state invests in research in the WHSC in molecular screening for new drugs, nanotechnology, vaccines, genomics, biomedical and tissue engineering, cancer, imaging, and neuroscience.
- The WHSC attracted $358.7 million in research funds last year. Major recent federal grants include $32.8 million to establish a National Center of Excellence for Influenza Research and Surveillance, $31 million to fund the Atlanta Clinical and Translational Science Institute to spur new treatments for patients, $25.5 million to lead a local component of the landmark National Children’s Study, $12.5 million to the Winship Cancer Institute to fund research in head and neck cancer, and $10 million to Yerkes National Primate Research Center to compare aging-related changes in human and nonhuman primates.
- The WHSC is a major player in technology transfer, with eight licensed therapeutic products in the marketplace in addition to 23 in various stages of development or approval. Emory has launched 43 start-up companies over the past decade, some with help from EMTech, a biotech incubator developed with Georgia Tech.
The Winship Cancer Institute is a key participant in the Georgia Cancer Coalition, a statewide program working to make the latest advances in cancer care available to all Georgians and investing in research at Emory. Winship also works with the Georgia Center for Oncology Research and Education to partner with community-based physicians to make more clinical trials of new treatments available to patients throughout the state.

The WHSC is the lead partner in the Southeastern Center for Emerging Biologic Threats, a regional consortium addressing natural and human-caused biologic threats, such as West Nile virus and pandemic flu. The WHSC also helps lead Emory’s Office of Critical Event Preparedness and Response, created last year to improve the university’s ability to deliver a coordinated and effective response to catastrophic events.

The Emory Vaccine Center is one of the largest academic vaccine centers in the world, with scientists working to develop vaccines for AIDS, malaria, hepatitis C, avian flu, and other infectious diseases. Emory’s Hope Clinic, which conducts clinical trials for promising vaccines, is part of the premier network in the country for HIV vaccine prevention trials. The Vaccine Center recently partnered with the International Center for Genetic Engineering and Biotechnology to establish a vaccine center in New Delhi, India, to develop vaccines against infectious diseases disproportionately affecting the developing world.

Emory provides medical direction of Grady Health System’s Ponce Center, one of the largest, most comprehensive AIDS treatment centers in the country, and was recently designated a primary site in the nation’s premier NIH-funded clinical trials network.

WHSC’s physicians provide $53.6 million annually in charity care through Emory Healthcare and $26.3 million in uncompensated care at Grady Memorial Hospital. Through Emory-Children’s Center, Emory also is the preeminent provider of specialty care to indigent children in Georgia. Nursing faculty and students support major volunteer efforts for homeless Atlantans, migrant workers, and people with AIDS. Public health faculty and students influence health policy affecting the community’s most economically vulnerable, and they partner with the state Division of Public Health to train workers in dealing with infectious diseases and to help prevent cancer, HIV infection, and adolescent pregnancy.

Woodruff Health Sciences Center Officers

M. Douglas Ivester  
Chairman, Woodruff Health Sciences Center Board
