Celebrate, Share and Build
Join us September 29th, 2020

Why do we celebrate the legacy of Dr. Bettye Rose Connell annually?

- To foster collaboration in scientific and clinical rehabilitation in environment, aging and dementia
- To highlight important work that builds on concepts that she promoted and explored
- To share and honor Bettye Rose’s contributions to gerontology
- To inspire the next generation of leaders in the aging field

Remembering Dr. Connell

Many know Bettye Rose tirelessly championed research investigating the impact of environment on older adults’ health to improve function. Her legacy endures because she was driven, brilliant, witty, creative and completely original. A beloved colleague, she was also irascible and unyielding — and her collaborators’ and mentees’ research were much better for it.

Please join us this year and every year to celebrate her life and continue her imperative mission.

September 29th, 2020
5:30 pm – 7:00 pm Eastern
Panel discussion following with:
Molly M. Perkins, Ph.D. and J. Mack Willis Sr.

Keynote Speaker:
Nimalie Stone, MD
Transforming Infection Prevention in Long-Term Care: Lessons Learned During the COVID-19 Pandemic

From the first time I worked with her on a grant at the kitchen table in 1996 I knew she was brilliant and meticulous. These traits, along with her kind heart, will make her live in my memory....

Joseph G. Ouslander, M.D.
